Medical Laboratory Sciences (1985) **42**, 417–420

Subject index

ABO, 86
Acquired Immune Deficiency Syndrome (AIDS), 237
Agar, 287
AIDS, 237
Algae, 404
Analysis, continuous flow, 310
Analysis of bacterial species and antibiotic susceptibility patterns using a microcomputer: an outline of one year's experience, 139
Antibiotic susceptibility, 139
Antibodies, 11
Antibody, 56
Anti-D, 88
Anti-fucose agglutinin in the ova of *Dicentrarchus labrax*, 199
Antigens, 20
Anti-LW^{a}, 88
Anti-LW^{ab}, 88
Antithrombin III, 44
Assessment of fibrin monomer polymerisation using a microcomputer, 129
Automated assay for serum ferritin, 230
Automated cell counters, 196

Bacteria, 289
Bacterial, 190
Bacterial adherence, 78
Bacterial enterotoxins, 190
Bacterial species, 139
Bacteriological culture, 95
Beta-propiolactone, 318
Biochemical investigations, 318
Biochemistry, clinical, 333
Bioluminescence in the continuous flow analysis of creatinine using immobilised creatinine amidohydrolase, 310
Biosensors in clinical biochemistry, 333
Biotyping of *Escherichia coli* by a multiple inoculation agar technique, 287
Blood coagulation factors, 307
Blood group diagnostic reagents, 115
Blood grouping, 86
Blood group serology, 361
Book Reviews:
A Color Atlas and Instruction Manual of Peripheral Blood Cell Morphology—*B.H. O'Connor*, 107
A Practical Handbook of Joint Fluid Analysis—*R.A. Gatter*, 207
A Wordbook in Pathology and Laboratory Medicine—*Sheila B. Sloane and J.L. Dusseau*, 305
An Introduction to Immuno-cytochemistry: current techniques and problems: Royal Microscopical Society Microscopy Handbook 11—*Julia M. Polak and Susan van Noorden*, 302
AIDS and the Blood: a Practical Guide—*P. Jones*, 413
Alternative Immunoassays—*W.P. Collins (Editor)*, 412
Applied Therapeutic Drug Monitoring. Volume II. Review and Case Studies—*T.P. Moyer and R.L. Boeckx (Editors)*, 414
Basic Quality Assurance and Quality Control in the Clinical Laboratory—*A. Wayne Bruce*, 304
Biochemistry. 4th Edition—*J.H. Ottaway and D.K. Apps*, 206
Blood Transfusion: a Conceptual Approach—*J. G. Kellon, Nancy M. Heddle and M.A. Blajchman*, 205
Cambridge Illustrated Thesaurus of Biology—*Anne C. Gutteridge*, 205
Categorisation of pathogens according to risk and categories of containment—*HMSO, The Advisory Committee on Dangerous Pathogens*, 409
Certistain Standards—*BDH Chemicals*, 412
Chemical Pathology and the Sick Child—*B.E. Clayton and J.M. Round*, 107
Chemotherapy of viral infections—*P.E. Cane and L.A. Caliguiri*, 111
Chromatography of Antibiotics. 2nd Edition—*G.H. Wagman and M.J. Weinstein*, 107
CK and LD Isoenzymes, a Self Instructional Test—*L.K. Brish*, 413
Clinical Applications of Monoclonal Antibodies—*E.S. Lennox (Editor)*, 415
Clinical Biochemistry of Alcoholism—*S.B. Rosalki (Editor)*, 414
Clinical Laboratory Annual: 1984—*H.A. Homburger and J.G. Batsakis (Editors)*, 209
Communicating in Science: Writing and Speaking—*V. Booth*, 416
Current Medical Abbreviations. 2nd Edition, 306
Disinfection, Sterilisation and Preservation. 3rd Edition—*Seymour S. Black*, 110
Gillies and Dodds Bacteriology Illustrated—*R.R. Gillies (Editor)*, 303
Histochemical Protein Staining Methods: Royal Microscopical Society Microscopy Handbooks 04—*J. James and J. Tas*, 302
Histochemistry, Theoretical and Applied. Vol. 2: Analytical Technology. 4th Edition—*A.G.E. Pearse*, 412

Histopathology: a Step-by-Step Approach—*M.G. Lewis and G. Rowden*, 411
Immunoassays in Coagulation Testing—*Zaheer Parvez*, 302
Interpretation of Pediatric Tests—*J. Wallach*, 111
Introduction to Medical Microbiology—*R. Anantharayan*, 208
Laboratory Mathematics. Medical and Biological Applications—*J.M. Campbell and J.B. Campbell*, 304
Leukaemia: Haematology 1—*J.M. Goldman and H.D. Preister*, 108
Lipid Histochemistry: Royal Microscopical Society Microscopy Handbooks 06—*Olga Bayliss High*, 301
Manual of Histology Techniques—*J.D. Bancroft and H.C. Cook*, 411
Manual of Nonfermenting Gram-Negative Bacteria—*Thomas R. Oberhofer*, 410
Manual of Practical Medical Microbiology and Parasitology—*Thomas R. Oberhofer*, 410
Medical Laboratory Haematology—*Roger Hall and Robert G. Malia*, 207
Methods in Haematology No. 11. Haematopoiesis—*David W. Golde (Editor)*, 412
Microbiological methods. 5th Edition—*C.H. Collins and P.M. Lyne*, 109
Monoclonal Antibodies—*K. Sikora and H.M. Smedley*, 303
Muscle Pathology—*Reid R. Heffner, Jr. (Editor)*, 209
New Dimensions in Antimicrobial Therapy—*R.K. Root and M.A. Sande (Editors)*, 303
Pancreatic Pathology—*G. Klöppal and P.U. Heitz (Editors)*, 109
Pathology of the Colon, Small Intestine, and Anus—*H. Thomas Norris (Editor)*, 109
Pathology of Tumours of the Oral Tissues—*R.B. Lucas*, 301
Pathophysiology-Mechanisms and Expressions—*G.G. Ferguson*, 206
Pathophysiology: Principles of Disease—*M.J. Miller*, 112
Practical Aspiration Cytology—*D. Melcher, J. Linehan and R. Smith*, 301
Practical Electron Microscopy. A beginner's illustrated guide—*Elaine E. Hunter*, 110
Practical Haematology. 6th Edition—*Sir John V. Dacie and S.M. Lewis*, 414
Quality Assurance and Control in Clinical Laboratories—*A.D. Farr (Editor)*, 205
Recent Advances in Histopathology. Number 12—*P.P. Anthony and R.N.M. MacSween (Editors)*, 109
Report of the UKEMS Sub-committee on Guidelines for Mutagenicity Testing. Part 1—*The United Kingdom Environmental Mutagen Society*, 305
Science Writing for Beginners—*A.D. Farr*, 416
The Operation of the Transmission Electron Microscope—*Dawn Chescoe and Peter J. Goodhew*, 304
The Pharmacology of Nerve and Muscle in Tissue Culture—*Alan L. Harvey*, 209
Writing Tasks. An Authentic Task Approach to Individual Writing Needs—*D. Jolly*, 210
The ZX Programmers' Companion—*J. Grant and C. Grant*, 306

Case for a high-throughput laboratory, 48
Cells, 60
Changing patterns in the medical laboratory, 113
